

REALTIME ENVIRONMENT MONITORING
AND MANAGEMENT SOFTWARE

EnviroLogicQ Platform

EnviroLogicQ is the next generation software for insight into your environment data. It acquires data from environmental sensors and analyzers in real time and stores it in a time series big data database. It alerts your environment team, in real-time, before any potential environment non-compliance. You can analyze and generate reports on this data for compliance reporting, O&M, process improvements and environment performance management.
